SHELF SIGNAGE Shelf Magnet Banners

Magnetic holder system suitable for metallic shelves.

INFORMATION

This magnetic shelf holder system features multiple solutions to the implementation of graphic promotions to metal shelves. The base is made of ABS with a magnet inside, it sizes 40x70mm, also it can be rotated to adjust exposure to optimal angle. To adjust the pole angle to the desired exposure, simply detach the base slightly from the angle bracket **2**, adjust the pipe to the proper angle **3**, and return the base to its original position so that it is secure **4**. The aluminum pole offers the possibility of approaching the promotion to the passerby and has several options to hang different sizes of graphics, including transparent movable hooks, transparent movable clips or grippers for attaching posters or promotions. Either to be used on or below the shelf, several models are available to meet your needs. This multi-position holder system is often used on metallic shelves, poles or walls, so it is widely used in shopping malls specially in shopping center, supermarket aisles or pharmacies.
